DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.
2. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.
3. In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-3 drawn to an isolated complex comprising a Q2 and a β -amyloid.

Group II, claims(s) 4-11, drawn a method of detecting in a biological sample a complex of Q2 and β -amyloid.

Group III, claims(s) 12-21, drawn to a method of detecting aggregation of β -amyloid.

Group IV, claims(s) 22-35, drawn to a method for screening for Alzheimer's disease.

Group V, claims(s) 36 and 37, drawn to an antibody.

4. The inventions listed as Groups I, II, III, IV, and V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:
5. Group I recites the technical feature of an isolated complex comprising a Q2 and a β -amyloid, which is not required by the other Groups II, III, and IV.
6. Group II recites the technical feature of correlating the level of a complex to the level of β -amyloid aggregation in a biological sample, which is not required by the other Groups I, III, IV, and V.
7. Group III recites the technical feature of detecting the formation of a β -amyloid plaques, which is not required by the other Groups I, II, IV, and V.
8. Group IV recites the technical feature of the administration of an effective amount of Q2 to a relevant tissue of a subject in need thereof, which is not required by the other Groups I, II, III, and V.
9. Group V recites the technical feature of an antibody, which is not required by the other Groups I, II, III, and IV.

Art Unit: 1647

10. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

11. The species of neurotrophins are as follows:

- a. Animal β -amyloid 1-42
- b. Animal β -amyloid 1-38
- c. Human β -amyloid 1-42
- d. Human β -amyloid 1-38

12. The following claim(s) are generic: 1-3 and 12-37.

13. Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

14. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

15. If Applicant elects any one of Group I, III, IV, or V one species from the β -amyloid group must also be chosen to be considered fully responsive.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert Hayes whose telephone number is (703) 305-3132. The examiner can normally be reached on Monday through Friday, 8:30AM to 5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gary Kunz, Ph.D. can be reached on 703-308-4623.
